

CEPT AND SPECTRUM SHARING

September 2024

Chris Woolford
ECC Chairman

ECC Strategic Plan

- CEPT ECC has much technical and policy expertise on spectrum
 - 46 member countries and extensive industry engagement
- Enabling more efficient use of spectrum to address spectrum scarcity
 - Innovative approaches, including consideration of new technologies and licensing frameworks
- Identified strategic principles relating to spectrum
 - Spectrum sharing
 - Transmitter and receiver parameters
 - Balancing the interests of all spectrum users

What are we doing on spectrum sharing?

- Recommendation on receiver resilience published in May 2024
 - Follows extensive work over past couple of years
- Public consultation on CEPT Report on shared use of the 3.8-4.2 GHz band published in June 2024
 - Consultation responses being considered
 - Final report expected to be addressed at ECC in November
- Two ECC Reports on the Upper 6 GHz band currently being progressed
 - Sharing between incumbent services and WAS/RLANs in the band
 - Sharing between WAS/RLANs and IMT in the band

Thank you!
