

Spectrum for Growth: Leveraging AI and 6G to Drive National Development

23 September 2024, DSA Summit 2024

Masanori Kondo, Secretary General, Asia-Pacific Telecommunity (APT)

Some perspectives

Connectivity as a Driver of National Development

How can policymakers in developing countries create spectrum management strategies that prioritize equitable access to connectivity and foster economic development?

Spectrum Sharing in the AI Era: Affordable Connectivity for All

What are the challenges and opportunities for developing countries in implementing spectrum sharing, and how can partnerships with the private sector help extend connectivity to underserved areas?

Some perspectives

Technological Innovations: AI as a Game Changer in Spectrum Management and Capacity Building

How can developing countries foster local expertise in AI and telecommunications to ensure that they are prepared to implement advanced spectrum management technologies?

Path to 6G: Policy Recommendations and Strategic Vision for Developing Countries

How can developing countries shape spectrum policies to balance the rapid technological advancements of 6G with the need for equitable access and economic inclusion?

Thank you
